

Tips and Tricks for the Teacher's Toolbox

Advanced PowerPoint Features

How to discuss a large or complicated schematic in a slide presentation?

One option -

Use the **Magnifying Tool** in Presenter View

Presenter's screen

The screenshot shows a Zoom meeting interface. The main window displays a slide with a flowchart. The flowchart consists of two rectangular boxes: 'Generate model prediction' on the left and 'Compare to inputs on hand' on the right, connected by a right-pointing arrow. Below these boxes, there are two smaller, partially visible boxes. A magnifying glass cursor is positioned over the slide. The Zoom interface includes a top toolbar with icons for 'Share Screen', 'Display Settings', and 'End Slide Show'. A video player at the bottom shows a progress bar at 6.56/10.40 and control icons for play, pause, and volume.

Audience view

Use Advanced PowerPoint Presenter View features in Zoom with 1 screen (Windows)

Excellent YouTube video! Please click on the cursor.
Watch the entire video or start from 6:56 for use of the magnifying tool.
